

CEUP 2030

Policy Learning Lab 2 – (09/02/2021)

The CE Interreg project CEUP 2030 invites you to the regional policy learning lab aimed at representatives from policy making organisations, higher education & research, SMEs, large enterprises, business support organisations and parties interested in increasing regional innovation and cooperation to be held on the **9th of February 2021** (Virtually).

✓ This PLL offers participants an introduction to the CEUP 2030 project and functions as an **enabler to our larger network building activities**. Your active participation and input will help shape, influence and implement the eventual creation of a large regional network comprising of three main stakeholder groups (Research, Industry and Policy makers).

✓ **The PLLs are established to train and empower people that work on policies & strategies for Industry 4.0 technologies**. They foster & anchor a policy training scheme where comprehensive learning processes are designed to be felt and understood quickly.

✓ In all our project activities, participants benefit from networking and connecting with innovation actors from different partner regions of Central Europe to **explore novel cooperation opportunities**.
